Pişti Case Document

Card Dealer Script is the main controller for card dealing and game management

User plays cards by clicking

Game-related data can be edited in the \"Preferences\" scriptable object."

The scoring system can be edited via RuleData.

"User data can be stored in the cloud with the FugoGamesApi script.",

At the end of each game an ad is shown from AdsManager via applovin.

Scores of users and computers are calculated via ScoreManager, based on RuleData
